**Biggest need:** Technology Development

#### About Control of Work – C.O.W.

We focus on producing products that digitize the Control of work at manufacturing plants. The products include software and hardware that replace the paper permitting system with computerized solutions. This product helps the client to have better control of the daily jobs of a manufacturing plant and it reduces the standing time that is generated by paper-based permitting. The technology also aids in increasing safety by having hold points in place to ensure all precaution is followed during maintenance work.
